COPPER STRIKE IN ALTA.

Rich Ore in the Copper King-Ajax North Drift Looking Well-Rich Strike Near Silver City.

Dr. J. T. White, who is president of the Century Mining company, returned last evening from Park valley district very much pleased with the condition of the mine and the progress being made with the mill. The doctor says everything is in much better condition than he expected to see. As evidence of the kind of work being done by the little 3-stamp mill the doctor exhibited a bar of gold bullion weighing 190 ounces and valued at about \$3,600. This represents a run of about twenty days, and is the largest bar of bullion shipped from the mine,

The new mill is now covered and two of the batteries are now in place. The botter is also in place and the doctor passed the engine and compressor at Kelton, ready for hauling to the mine. This is the last of the machinery or-dered for the mill, but for all that it is thought that it will be thirty days more before the mill is in operation. The management is getting everything in shape for the increased output. Already the company his 1,500 tons of ore on the dump. Everything is being arranged in the mill with a view to econ-The photos just taken show a heavy trestle work connecting with the lower tunnel and the top of the milk Once the ore is dumped in the mill it continues its course by gravity. C. W. Blethen is master machinist, while while George Green is the mill wright. White says the company will make \$5,000 by amalgamation this month. In addition the company has 115 sacks of

concentrates now on hand. The doctor confirmed the story that he had been offered \$214,200 for his 71,400 shares of Century mining stock, which is at the rate of \$3 per share.

STRIKE IN COPPER KING.

Samples of Very Fine Copper Ore

Exhibited from the Alta Claim. A number of samples of very fine coner ore were being exhibited today by Lewison, who has just come down from Little Cottonwood mining district. strike was made at the depth of forty feet from the surface. The bot-tom of the shaft is said to be all in ore of similar grade to that shown to-day, which looked as if it might carry 25 per cent in the red metal. The ore was taken from the old Copper King claim near Alta now known as the Bolivar No. 1. It is being worked by Mr. Lewison and two other parties who have followed a nice grade of ore from the surface, but the present discovery is exceptionally fine and inspires the belief that with depth the property will prove to be a paying mine.

Ajax is Improving.

Manager Weir, of the Ajax, reported a material improvement in the north drift on the 1000 level of the Ajax, of Tintic. The ore body—if small patches of good ore mixed with low grade stuff can be an ore body-is fully three feet wide. While it is yet below pay on an average, the character of the ore inspires the belief that something much better is not far distant. The drift is ow about 400 feet from the Mammoth. It has cut a very strong fissure about four feet wide, on which Mr. Weir expects to drift as soon as better air cirulation can be secured. The outlook in the south drift is said to be unchanged.

Bought by Bamberger.

The property of the Fortune Mining and Milling company has been sold under foreclosure on a judgment to Bamberger for \$34,363, amount of a mortgage and interest in his favor along with a \$1,150 judgment for the Salt Lake Hardware company. Some \$4,000 in labor claims are said to be standing against the property, and the sheriff will hold out sufficient of the purchase price to satisfy these claims should they be considered legal.

Active at Stateline.

More work than usual is being done Pike's Diggin's section of Stateline The Johnny mill was closed down a

few hours on Wednesday, but in the evening it resumed work and is now handling a little more ore daily than at any time since it started. A force of eighteen men were put to work on the water in Rice canyon a few days ago. They will continue to sink until bedrock is reached. Then they will crosscut the lower level, and

indications are that they will thenhave water galore. The Burro cabin was burned to the ground Thursday afternoon. George Anderson, Neil McLeod, Matt. Reese

and Harvey Hedges had a lot of their personal effects in the cabin, and, with considerable currency, the whole went up in smoke.—Stateline Sentinel.

Exhibits for Mining Congress.

The Utah exhibit for the International Congress to be held at Boise, Idaho, on the 23rd, 24th and 25th inst. will be shipped tonight. Mr. Herman Bamberger said today that while he could not state how large it really is as all the boxes were not at the depot at noon to-day, he believes it will make up a full Meantime great preparations are being made on the other end for the display. The Bolse Statesman says a arge number of workmen are constant-y engaged preparing the rooms of the senate and representatives for the re-ception of the ores to be exhibited durng the coming session of the Interna onal Mining Congress, The work now forwarding is getting stands, tables, etc., in readiness. It will be completed in a few days, and by Saturday, it is anticipated by those having the matter in charge, the entire display will be

The property has been under development, or prospecting, for a number of years. Numerous tunnels have been run to tap this ledge, which the original owner was certain existed, but hitherto without success. The property is on Florida mountain, and is between Silver City and De Lamar. One of the tunnels is over 800 feet in length, running straight into the mountain.

Montana Con. Company. The Montana Consolidated Mining company filed articles of incorporation with the county clerk today. The capital stock is \$100,000 in 25-cent shares. The directors are Robert Mulhall, presdent; William Kelly, vice president; J B. Weimer, secretary and treasurer H. G. Twomey and Peter Weimer. The property lies near the Ophir Hill in Ophir canyon.

BOSTON WOOL MARKET.

Boston, July 17.-The American Wool and Cotton Reporter will say tomorrow: The wool market is stronger and more active. The increased business has been very unevenly distributed, however, a half dozen houses having transacted the bulk of the business. The demand has been chiefly for terri-tory and Oregon wools, although an interest has been manifested in fleeces all of which have been moved at ful rices. The trend of the market on fine stocks is towards a higher level and a better inquiry is noted for medium stock. Some dealers report that it is impossible to get higher prices, but on fine wools better prices certainly have been obtained than could have been secured two or three weeks ago. From the lowest point touched in the past year, there has been a recovery from to 4 cents per scoured pound or say to 10 per cent.

The sales for the week in Boston amounted to 6,780,000 pounds domestic and 140,000 pounds foreign, making a total of 6,920,000, against a total of 3,-82,700 pounds for the previous week and a total of 1,663,000 pounds for the corresponding week last year. The re-celpts of wool in Boston this week amount to 29,241 bales, against 14,843 bales last week and 17,245 bales last

Shipments of wool for the week ending July 15, aggregate 5,662,799 pounds. This shows an increase of 1,939,688 pounds over the shipments of 3,723,021 pounds for the previous week. Since January 1 the total shipments amount to 131,725,185 pounds.

### You Deal With But One Concern.

The Burlington, route operates its own trains over its own tracks every foot of the way from Denver to Chicago and St. Louis.

When you buy a ticket over the Burlington, you deal with but one concern. If you have any cause for complaint— or think you have, which amounts to the same thing—you do business with but one railroad. You are not told that

"we're not responsible for this," or "he shouldn't have said that," or "we'll refer this to our Chicago office."

Leaves Denver 4:60 p. m. for Omaha,
Peoria, Chicago, St. Joseph, Kansas
City and St. Louis. Another good train eaves at 10:00 p. m. Train for Black Hills, Montana, and
